It is possible to use a percussion instrument such as a low log drum or slit drum. The mallet for this instrument should be chosen in a way that it produces the lowest and most round sound.

## **THE WOODEN BOX**

The inspiration for using the wooden box as part of the percussion setup of *Hugs Catalogue* came across while listening to one of my foremost references, the Soviet composer Galina Ustvolskaya (1919-2006), who used a similar instrument in her *Composition no. 2, "Dies Irae"*.

Ustvolskaya mainly focused on the development of her individual and unique spiritual insight, which is the conceptual point of departure of this piece. Therefore, the entrances of the wooden box throughout the work have to be faced up in a special mood and with a certain attitude. The wooden box separates the sections of the piece in a ritualistic manner and brings about a heavy and intense tension and atmosphere, governed by silence and sobriety, and maintained by the behavior of the performers.
